November 01, 2020

Goals

- This is the first week, so no goals set from last week to accomplish

This Week's Progress

- Jordan
  - Set up discord to communicate
  - Github repo set up
  - Added very rough flask app to the repo
  - Set up ci to run tests and check formatting
  - Added Professor/TA to repository
  - Shared how to do git stuff with team
- Jacob
  - Joined discord to communicate
  - Joined github
  - Looked over Jordan's repository
  - Discussed ethics with group
  - Practiced flask
  - Researched SQLite
- Bernard
  - Github repo set up
  - Work on the wireframe and get it set up
  - Started talking about the vision of the project
  - Worked with team members to set up storyboard
- Robert
  - Figured out a few features I think will be valuable
  - Got set up with github
  - joined group discord
- Abdullah
  - We had a team meeting last Friday morning that get everyone on the same page and established roles. This was a critical meeting to kickstart our project and make sure everyone is familiar with the project resources.
  - I was assigned the role to be a front end developer, UX designer and prototyper.
  - We are submitting our wireframes and storyboards today.

Next Week's Goals

- Jordan
  - Keep up with project milestones
  - Figure out what roles everyone on the team wants
  - Figure out how much everyone else on the team wants to contribute
  - Set up database with dummy data
- Jacob
  - Practice with SQLite and flask implementation
  - Find my niche within the group
  - Practice with front end design
- Bernard
  - Keeping up with project milestones
  - Seeing what more I can do with my role

- - Figuring out the specific roles for the team
  - Make dummy web pages
- Robert
  - Figure out how each feature will be best implemented
  - Dust off rusty python skills
- Abdullah
  - Next week's goals are to continue complete our assigned GitHub issues and hit our sprint deliverables.

Meeting Agenda

- Should each member have dedicated or primary roles?
  - What if a milestone doesn't have a nicely balanced workload between roles?
- Should we try to have someone represent a scrum master?
